THE COLLECTION

by Michael Miller

Beauty, warmth, a work of art... discover The Collection

When I imagine my ideal home, I imagine the perfect combination of form and function. And right at the heart of my home, a fire that impresses me with its looks, its innovation and its energy efficiency.

A fire is never just a fire. It's a statement of style that brings a home to life. So, we've crafted this stunning collection of unique gas and electric fires – each of them created to offer you the highest quality and superb energy efficiency. They look beautiful; they work beautifully.

I'm proud of The Collection, and I have absolute confidence in the quality, reliability and durability – so much confidence, in fact, that I offer a 25 year guarantee on gas fires, and 5 years guarantee on electric fires.

You'll find more details about our guarantee in this brochure, along with all the inspiration and information you need. I hope you enjoy choosing your new fire.

Discover our Gas & Electric Fires & Suites

Beautiful fires with the power to transform a room. Fabulous suites, sleek 'wall inset' designs, and easy-to-install fires that don't require a chimney. Every model starts from a design concept nurtured by our research and development team. Our products are assessed and approved by leading independent organisations. Each fire is then made with the utmost care in our state-of-the-art development and manufacturing site here in the UK. And only when a fire has been rigorously checked by our quality control department does it leave our hands.

Choose a fire from The Collection, and rest assured that behind the beauty and warmth lies a technology innovated and crafted to perform and impress.

Every gas fire carries a 25 year Comprehensive Guarantee† providing you with reassurance and peace of mind for many years to come. That's a 25 year Guarantee against manufacturing and material defects, including parts and labour, subject to our 'Conditions of guarantee' including annual service and annual replacement of the oxy-pilot/ thermocouple assembly.

We offer this guarantee, unlike any other gas fire manufacturer, as a sign of our commitment to the highest standards of build quality, safety and performance. In line with gas industry practice, we advise that all our gas fires are installed and serviced annually* by a Gas Safe Register engineer to ensure continued safe operation and optimum performance throughout the lifetime of the product.

† Applicable only to gas fire engines. Fire surrounds and fascias carry a 12 month guarantee. * This is also a requirement of your 25 year guarantee.

Our premium range of Celsi electric fires provides versatile heating for any room in your home simply by plugging into the nearest mains socket. Discover our contemporary styles designed to look sensational and create comfortable controllable warmth.

Celsi electric fires provide a user friendly, simple to operate experience, whilst delivering optimal energy saving performance and assurance. We are confident you are getting a product that is built to last. That's why we offer a 2 Year Guarantee across our electric fires range, with an extended guarantee to 5* years on selected Celsi models.

* 2 years full guarantee and 3 years parts only. Only applicable to electric fire engines. Fire surrounds and Fascias are subject to 12 months guarantee.

high efficiency

BFM Europe Ltd has always had a reputation as a manufacturer of some of the most efficient fires on the market. Now we are setting new industry standards with The Collection by Michael Miller range and providing exceptional heat output combined with lower running costs compared to standard gas fires.

All gas fires in this range feature a glass panel across the front of the fire which radiates the heat generated from the fuel bed directly into the room. The glass panel concentrates the radiant heat generated by the flame effect and projects it directly into the room to ensure that more heat is used to warm the room and less is lost through the chimney.

This radiant heat is combined with convected heat which is produced by cool air drawn into the fire through the heat exchanger and emitted as warm air through the gap above the canopy. Making our gas fires some of the most efficient available.

Many of the fires found in this brochure have a balanced flue system, designed for those who want all the benefits of a gas fire but don't have a built in chimney or flue in their home. They work in much the same way as our conventional flue fires but come with their own flue terminal which is vented directly through an outside wall or via the roof of your home. Several of our balanced flue fires can be purchased with either a horizontal or vertical flue kit to give you more flexibility in the location of your fireplace.

More information about balanced flue kits can be found on pages 80-81.

Product Testing & Certification

All our gas fires are independently tested, approved and verified by the British Standards Institution (BSI) to meet the latest standards for performance, safety and efficiency.

BSI is an independent organisation. They are not owned by the government, industry or shareholders, which means that they can be totally objective with regards testing and certification. This gives their assessments more authority than those of an organization that has a vested interest in promoting its members.

They have some of the most experienced and knowledgeable staff in the world and are recognised internationally for their technical expertise, quality services and in-depth knowledge of gas and electrical product testing and certification.

The wide-ranging capability of their testing facilities and the broad expertise and knowledge of their testing and certification staff ensures our products are rigorously tested with the utmost integrity.

ECODESIGN COMPLIANT

This logo signifies that the product is fully compliant with the Eco design directive Commission Regulation (EU) 2015/1188.

CRAFTED IN BRITAIN

Every gas fire in The Collection by Michael Miller range is developed and manufactured in Britain at our purpose built state-of-the-art facility in Staffordshire.

A Touch of Class... Deluxe Glass

“Your choice from our Deluxe range is a pure reflection of your own desire and belief in high quality, style, sophistication and cutting edge design. MM-44 INTEGRATED DUAL FLAME BURNER

Da Vinci Illumia MD
Gas Fire Suites

The Da Vinci mid-depth gas fire is now available in three limestone Illumia suites, the classically designed Da Vinci, Giuliano, and the more contemporary Monet, all sure to be the centre of attention in any home. The fire provides highly realistic logs, paired with the latest MM-44 dual burner technology, delivering log burning flame integration set against a black & onyx grey deluxe glass interior, or a beautiful black enamel interior.

These suites are available as conventional flue models, suitable for installation into any standard brick chimney or pre-fabricated flue, with a maximum heat output of 6.8kW. Each surround features controllable inset decorative lights, and the fire features include our multi-functional remote control system with thermostatic and timer functions. Non-reflective glass provides an exceptionally clear vision of this most natural and truly vibrant living flame gas fire.

***A 240V mains electricity supply is required to power the remote control system.**

Eden Elite & Slimline BF

Conventional & Balanced Flue Gas Fires

The Eden Elite is our slimmest wall inset gas fire with up to 85.6% energy efficiency and up to 4.9kW heat output. It is operated by a thermostatic remote control system to perfectly control your comfort.

The conventional flue model is designed to be easily installed into almost any chimney without compromising on the stunning log fuel effect and flame aesthetics.

The Slimline balanced flue model is a perfect solution for homes designed without a chimney or flue.

The Eden Elite is a non-reflective glass fronted fire that can be fitted with or without a fascia. Fascia options are available in brushed satin silver or matte black finish. Both models are available with black enamel interior lining.

***A 240V mains electricity supply is required to power the remote control system (Balanced flue only).**

U-VR Elite
Ultiflame VR Electric Fires

The Ultiflame VR Elite is a wall inset electric fire that benefits from a multi-functional handset controller with integrated design features.

Through innovative technology we have created a virtual flame, real fire experience with visual depth and realistic flame movements. The fuel bed ceramics capture the authentic shape and texture of natural logs, that are positioned on a perception of hot glowing crystal embers.

Enjoy the relaxing warmth of a Virtual-Reality fire experience all at the touch of a button.

The U-VR Eite is available with a choice of two brushed metallic fascias, Satin Black, and Satin Champagne. Also available as a minimalistic fascia-less fire.

- Features**
- Open fire experience
 - Customisable fuel effect
 - Silver birch logs
 - Crystal ash embers
 - Single or dual colour flame
 - LED brightness control
 - Thermostatic remote & manual control operation

Avignon Eden Elite & Slimline BF
Conventional & Balanced Flue Suites

This stunning fireplace suite comprises the classically styled Avignon surround in 54 and 58 inch wide versions, made from high quality natural Portuguese Limestone and includes the fabulous Eden Elite gas fire.

The conventional flue option features a stunningly realistic raised log fuel effect. It has an energy efficiency of 78.6% and impressive heat output of up to 4.9kW.

The slimline balanced flue option is suitable for installation into homes without a brick chimney or pre-fabricated flue and has an impressive energy efficiency of 85.6% and 3.7kW heat output.

Both models feature a glossy black enamel interior and benefit from non-reflective glass. Operated by a thermostatic remote control system, these fires can maintain a comfortable room temperature at the touch of a button.

***A 240V mains electricity supply is required to power the remote control system (Balanced flue only).**

ZIG-ZAG FLAME BURNER TECHNOLOGY

Luxe Gas Fire

A combination of elegance and performance makes the Luxe an extremely desirable gas fireplace. Its perfectly proportioned glass frame provides a three-side view of one of the most stunning flame effects available today.

The Luxe features a driftwood fuel effect with glowing embers and a glossy black enamel back panel which reflects its enchanting flames, and is operated by a stylish remote control handset with a thermostatic function which allows you to pre-set your desired temperature level so that you are never too cold or too warm.

This balanced flue gas fireplace can be purchased with a choice of horizontal or vertical flue kit so can be installed almost anywhere in your home and offers an exceptional 76.4% net energy efficiency with a heat output of 6.7kW.

Installation of the appliance is made easy with integrated adjustable legs and the option to purchase a false chimney kit consisting of metal studwork which can be clad with the fitters' choice of high temperature board. (see page 75 for further details).

Passion HE
Gas Fire Suites

The Passion HE Suite combines a luxury hearth inset gas fire with a natural finished surround, available in a choice of Portuguese Limestone, or a popular choice of Limestone and black Granite. Designed with clean lines and modern bevels this suite is sure to make an impression in any home.

The fire has a large window for wide-angle viewing, and comes with superior flame vision non-reflective glass. For maximum comfort and control we have fitted a fully automatic thermostatic remote control system, enabling you to sit back, relax and enjoy the warmth, all at the touch of a button. Highly detailed ceramics provide an authentic appearance of a natural burning log fire, whilst the glossy black enamel interior provides high contrast behind bright flowing flames.

The Trim and Fret option is for those who enjoy a more traditional fire setting, for which we have combined the highly stylish Signature Trim, with the exclusive Bauhaus 151 Fret.

The one-piece Fascia option provides a more contemporary choice and comes with the uniquely designed MM Signature Fascia. Additional black enamelling is added to the exterior of the fire creating even more luxury aesthetics between the fascia and the flames.

Three popular colour finishes are available, Black Nickel & Black, Chrome & Black, Brass & Black.

Luxe Fire
False Chimney Kit

A false chimney kit is available at an additional cost to simplify the installation of the Luxe gas fires. The false chimney kit consists of the metal studwork and screws required to create the false chimney structure. This can then be clad with the fitters' choice of high temperature board*. We recommend a non combustible board such as Promat Supalux in a double 6mm thickness, giving an overall thickness of 12mm. Promat Supalux board is available from CCF Manchester. * not supplied by BFM
